PowerPoint Extensions

- PPT
- PPTS
- PPTX
- PPSX

Chapter 4. How to start creating a virtual reality (VR) lesson

Learn how to begin creating a virtual reality (VR) lesson in Adobe Captivate

A virtual reality (VR) lesson can be designed using a 360 degree image. Here is how you add elements to a 360 degree image.

1. Click File, New Project, and select Virtual Reality Project
2. Add a 360 degree image or video by clicking on the button in the center of the slide
3. Choose an image from your computer and open it
4. To add information to a spot on the image, select Hotspots from the top toolbar and choose the "i" icon from the drop-down menu
5. When the "i" icon appears on the image, drag it where you want it
6. In the menu to the right, change the title of the info, click the drop down menu, and choose display text.
7. Type what you want to display in the text box on the right hand menu
8. Click anywhere in the 360 degree image to close the menu and view the information as it appears in your image
